SUMMARY

Python Full Stack Developer with 2 years of experience in creating web applications that work smoothly and are easy to use. Experienced in building complete systems, from backend services using Django and Flask to clear and responsive frontend interfaces. Focused on turning requirements into working solutions that function reliably and meet user needs.

EXPERIENCE

Python Full Stack Developer

Xianinfotech LLP

June 2025 – Present

Kaloor, Kochi, Kerala.

- Set up 5+ full-stack web applications with seamless backend logic and intuitive front-end interfaces, improving system stability and boosting user engagement.
- Built RESTful APIs and integrated 10+ third-party services (payment gateways, analytics tools, cloud storage), increasing data processing speed by 40%.
- Fixed date-handling issues, including abbreviated month formats, ensuring accurate display and processing across all applications, and improved deployment workflows using CI/CD tools (Jenkins, GitHub Actions), cutting deployment time by 50% across 8 client projects.

Python Full Stack Developer

EENTH Innovations

Dec 2024 – May 2025

Kozhikod, Kerala

- Maintained backend systems using Python with Django and Flask, creating 15+ RESTful APIs and optimizing database schemas (PostgreSQL, MySQL).
- Developed responsive frontend interfaces with HTML5, CSS3, JavaScript, and React, integrating them with backend services to deliver 12+ functional web solutions with faster page load times.
- Built full-stack applications using the MERN stack (MongoDB, Express.js, React, and Node.js), enabling smooth client operations and lowering bounce rates through careful integration of features.

Python Full Stack Developer

Brototype

July 2023 - September 2024

Kozhikode, Kerala

- Gained real-world skillset in full stack engineering through building real-time projects involving backend logic and frontend design.
- Constructing scalable backend structures with Django REST Framework, focusing on secure endpoints and optimized database architecture.
- Formulated dynamic web interfaces in React.js and Tailwind CSS, ensuring fast performance and smooth data interaction with APIs.

PROJECTS

Orado

(Project Link)

Aug 2025 – Present

- Led development of a multi-role delivery platform serving 500+ users, creating a backend with Node.js to handle customer and restaurant interactions.
- Crafted a React.js frontend for a clear ordering experience with live order tracking, achieving 92% user satisfaction.
- Implemented order management logic to handle 200+ daily transactions, coordinating delivery personnel and improving on-time delivery rates to 95%.

Clareoport

(Project Link)

June 2025 – July 2025

- Created an investment management system tracking portfolios worth \$2M+ and handled 80% of reporting tasks automatically, saving 15 hours per week.
- Added investor communication features, providing interactive dashboards with performance updates to 100+ stakeholders.
- Built core financial processing logic in Python, achieving near-perfect accuracy and improving operational efficiency.

RealDent - ERP Software

Jan 2025 – Apr 2025

(Project Link)

- Engineered a complete ERP system for dental practices, combining accounting, patient management, appointments, and inventory in one platform.
- Executed a full accounting module with balance sheets, income and expense tracking, and supporting accurate financial reporting across 50+ clinics.
- Optimized patient flow by implementing a digital appointment and tracking system, decreasing administrative workload by 30% and reducing missed appointments by 25%.

EDUCATION

Ideal International College

BA English Literature

Malappuram, Kerala

Aug 2020 – 2023

TECHNICAL SKILLS

- **Python Technologies:** Django, Django Rest Framework (DRF), Flask, ORM, Model Managers, REST API Integration, Authentication (JWT, Sessions), Database Handling (SQLite, PostgreSQL), Caching
- **Frontend Technologies:** React.js, Next.js, JavaScript (ES6+, DOM Manipulation), TypeScript, React Hooks, Context API
- **State Management:** Redux (Flux), React Query
- **UI/Animation:** CSS (Transitions, Keyframes), Framer Motion, Responsive Design, UI Design
- **Backend & APIs:** Server-Side Rendering (SSR), RESTful APIs, JSON Web Token (JWT), Node.js
- **Build Tools:** Webpack, Babel, NPM, Vite
- **Development Practices:** Code Reviews, Performance Optimization
